

Preface

Dear Readers,

it is with pleasure that we present to you the first issue of Avant this year. This bilingual collection of papers is devoted to the interdisciplinary feminist research and guided by the concept of “feminism as interventions.”

The main section is divided into three parts: *Gender Problem in Science, Subjectivity in-Between. On Femininity and Masculinity*, and *Gender of the Social*. We present articles by Monika Rogowska-Stangret, Marzena Adamiak, Katarzyna Więckowska, Anna Kola and Aleksandra Derra (original papers), as well as Dorothy Hobson, Londa Schiebinger and her colleagues (Polish translations). The issue also contains book reviews by Ewa Bińczyk and Michał Bomastyk. A special review by Katarzyna Lewandowska and interview with Bogna Burska round up the collection.

An important part of this issue are art works by Bogna Burska, Maess, Dora Chilińska and Urszula Kozak. Polish authors of the issue mostly represent the Nicolaus Copernicus University (this research area is characteristic for this academic community).
